

Shockwave

Part No: TLS.01.1F21

Description:

Shockwave Wideband 5G/4G Direct Mount External Antenna With N Type(F) connector

Features:

Applicable for 5G/4G cellular bands 600-6000MHz Wideband Operational Over 45% efficiency and 2.3 dBi gain Mechanically robust for indoor/outdoor applications Height: 79.45mm (3.13") Diameter: 42mm (1.65") IP67 Waterproof N type(F) connector RoHS & Reach Compliant

1. Introduction

The Shockwave TLS.01.1F21 is a permanent mount, waterproof, external 5G/4G cellular operating at the wideband 600-6000MHz frequency with an N type Female direct mount connector. It has been designed to be used on a Ground Plane. It can be used in mobile and fixed applications for 5G/4G wireless such as:

- Public safety
- HD Video Streaming
- Utilities and Smart Cities
- Fleet Management
- Agricultural
- Industrial

This antenna has superior performance over wide-bands compared to traditional whip antennas. Up to 90% efficiency and with a minimum 2.3dBi peak gain over all cellular bands result when mounted on a 30x30 cm ground plane. Stable radiation patterns over low angles provides consistent gain in the horizontal plane, meaning that it is especially suitable for cellular applications.

A unique indent tab on the base of the antenna allows a wrench to be used to solidly lock the antenna on top of its mounting location, where an N type female connector juts out from a metal panel. Waterproof O-rings around the bottom base prevent water from leaking under the antenna.

The TLS.01 antenna is IP67 waterproof resistant against high pressure water jets in commercial cleaning environments, which makes the antenna ideal for 5G/4G/3G/Cat M/NB-IoT applications either in indoor or in harsh outdoor environments. For more information contact your regional Taoglas customer support team.
